## NEW SOLAR Pro-Logix Battery Maintainers from Clare Automotive

Clare Automotive introduces a new line of **SOLAR** brand *Pro-Logix* automatic battery maintainers. With *Pro-Logix* maintainers, batteries are charged better and faster, avoiding damage and resulting in improved reserve capacity. **SOLAR Pro-Logix** automatic battery maintainers deliver numerous feature enhancements to make battery maintenance quicker, easier and more assured.

**SOLAR Pro-Logix** automatic battery maintainers control many variables through each phase of the charging process to ensure an optimal charge every time. Operation is fully automatic, freeing the operator for other tasks and delivering the same consistent, beneficial charge every time. In addition, each model features polarity protection, outputting current only when a proper battery connection has been made.

*Pro-Logix* battery maintainers are compatible with a wide variety of battery types and sizes, including Conventional, Maintenance Free, AGM, Gel Cell, Deep Cycle and Marine batteries. With the increasing use of non-traditional starting batteries in today's vehicles, it is important for technicians and consumers alike to have a maintainer that can properly charge and maintain a variety of battery types.

*Pro-Logix* battery maintainers are simple to set-up for each charging/maintenance application. The operator simply selects battery voltage and type, and the maintainer automatically executes the automatic charging process, resulting in quick, easy and beneficial operation.

Two models are available: PL2135, 6/12 Volt 3.5 Amp Battery Maintainer and PL2110, 6/12 Volt 1.0 Amp Battery Maintainer. Each model ships complete with multiple output accessories: clamp output accessory set and ring terminal accessory set. A 12V male plug output accessory kit is also available.

Clare Automotive is a leader in the design, development and manufacture of automotive service equipment for professionals and consumers, including jump starters, battery chargers, power inverters, air conditioning service equipment and diagnostics, cooling system service equipment and automatic transmission fluid exchange equipment. More information can be found at [www.clareautomotive.com](http://www.clareautomotive.com).
