NEW SOLAR 500 Watt Industrial Grade Power Inverter from Clare Automotive

Clare Automotive introduces a new 500 Watt **SOLAR** brand Power Inverter, Model No. PI5000X, to its Industrial Grade Power Inverter lineup, which includes: PI10000X (1000 Watt), PI15000X (1500 Watt) and PI20000X (2000 Watt). The new 500W model, featuring **SOLAR** Sonic Compression technology, is designed to deliver clean, reliable power from a 12 Volt power source to a wide variety of power equipment, electronics and appliances.

SOLAR Sonic Compression technology utilizes a proprietary modified sine wave design to provide stable, clean and reliable power throughout the operating range of the inverter. All models in the **SOLAR** Industrial Grade lineup utilize upgraded components and feature rugged construction to stand up to the most demanding of applications.

Like all **SOLAR** Industrial Grade Power Inverters, the new 500 Watt model features temperature-activated fan control to eliminate unnecessary draining of the 12 Volt power source when in standby mode. The new 500 Watt model features two AC outlets plus a USB outlet to power small electronics and includes both a clamp set and a cord with 12V male plug for connection to the 12V power source.

Clare Automotive is a leader in the design, development and manufacture of automotive service equipment for professionals and consumers, including jump starters, battery chargers, battery testers, power inverters, heavy-duty starting equipment, cooling system service equipment and automatic transmission fluid exchange equipment. More information can be found at www.clareautomotive.com.
